# 1. Installing PowerCloud

## (1) Searching

Go to **Google Play** to search the keyword **PowerCloud**.

## (2) Installing

After searching, click on the **PowerCloud(iTe2 Technology)** and then start to **Install**.

Open the apps after installation and then click **Start** to experience **PowerCloud**.

The image displays two screenshots of the Google Play Store for the PowerCloud app. The left screenshot shows the app with an '安裝' (Install) button. The right screenshot shows the app with '解除安裝' (Uninstall) and '開啟' (Open) buttons. Both screenshots show the app's rating of 5.0 stars, 10 downloads, and 5 users. Below the screenshots is a description in Chinese and a green box with a new feature announcement.

**新功能**  
\*首次更新至版本[1.0.1]時，建議將PowerCloud移除後重新安裝。

## 2. Using PowerCloud

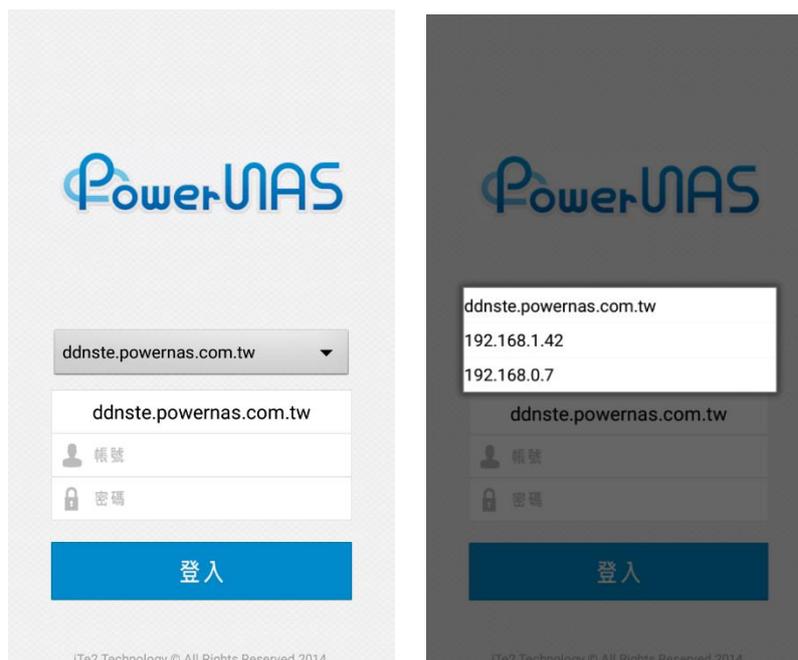

### (1) The Login Page

1		Switching to the Login Memory function
2		Searching the IP address of PowerNAS device in the local network(LAN)
3		Login after entering the correct address, account and password of host computer.
4	Smartphone Function Key	Auto Login option

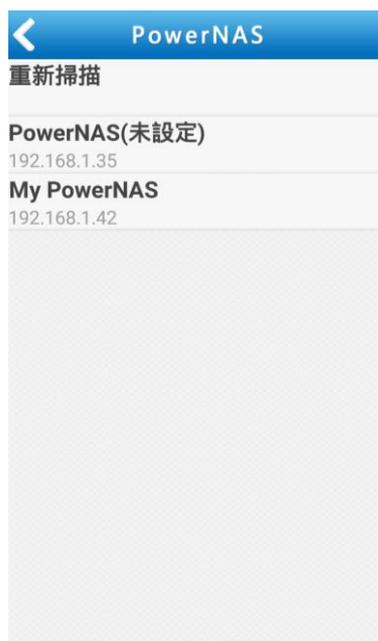

## I. Login Memory Function

When logging-in successfully, you can use the Login Memory menu to select a login device address for next time.

## II. Searching PowerNAS Device IP Address

The Scanning Device function can only be used in the same LAN as PowerNAS.

### III. Login to PowerCloud Home Page

After successfully logging-in by entering the correct user account and password, you can start using PowerCloud.

### IV. Auto Login

It can memorize your user info after your successful login. When the user has not logged-out from his account, login will happen automatically when the apps are next opened.

## (2) Main Page

1		Menu function key
2	 <b>XBMC遙控器</b> 用手機控制XBMC畫面，輕鬆讓影片與音樂掌握在自己手中。	<b>XBMC Remote</b>
3	 <b>檔案管理</b> 可輕鬆讀取NAS上的檔案，進行下載與上傳的動作。	<b>File Manager</b>
4	 <b>手機通訊錄備份</b> 簡單一鍵將手機上的通訊錄匯出至NAS中，輕鬆備份手機通訊錄。	<b>Smartphone Directory Backup</b>
5	 <b>系統資訊</b> 記錄NAS的版本與序號。	<b>System Info</b>

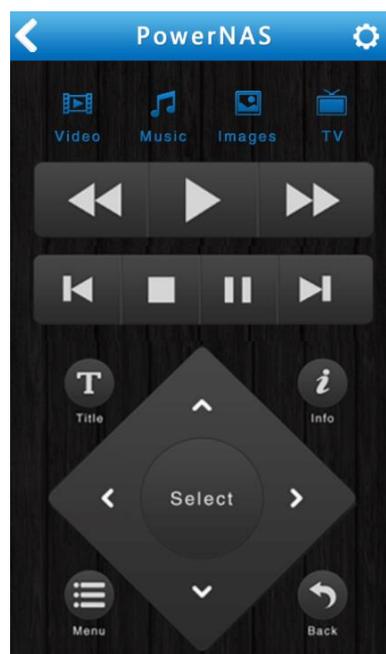

## I. Menu Function Key

It is used to see the Logged-in User, **Close** PowerCloud app, **Logged-out** user, **Restart PowerNAS** or **Close PowerNAS**.

## II. XBMC Remote

By entering **XBMC Remote**, you can remotely control the XBMC play platform.

### III. Files Manager

This is the communicating bridge between your smartphone and **PowerNAS**. You can use it to browse files, upload, download, watch photos and play videos.

### IV. Smartphone Directory Backup

It can export your smartphone directory to **PowerNAS**, or import the backed-up directory into your smartphone.

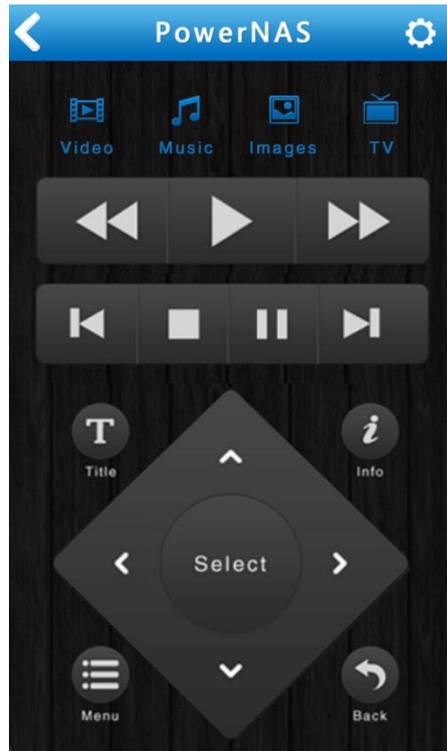

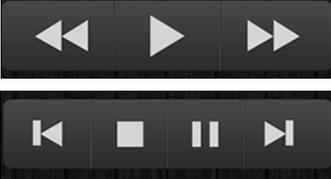

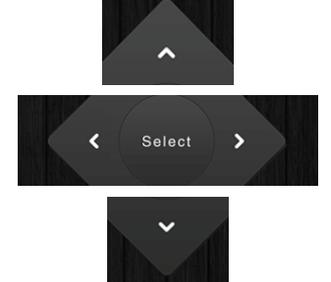

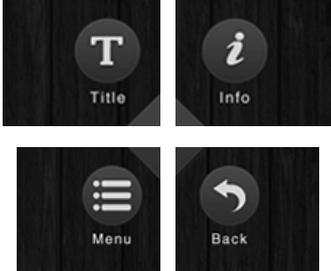

## V. System Info

This can display the hardware information, IP address, hard disk status, etc. of PowerNAS.

## (3) XBMC Remote

1		Quick Switch Mode
2		Multi-media Control Keys
3		Main Control Zone
4		Function Key

## (4) File Manager

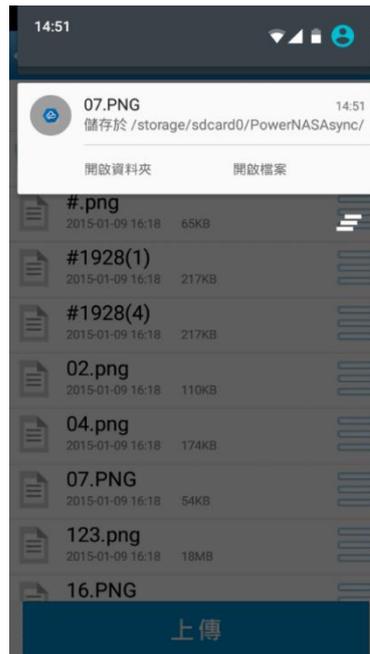

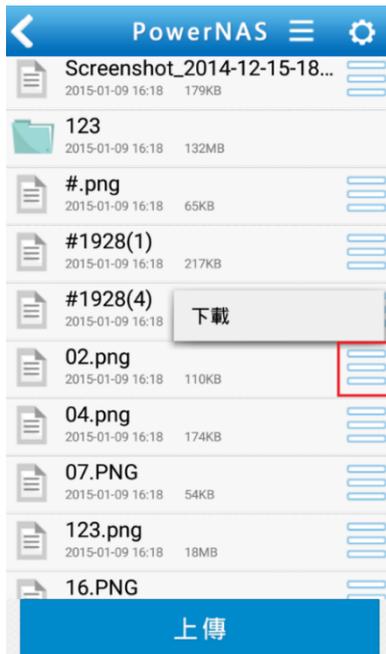

### I. Basic Operation

After entering into **File Manager**, you can change the icon mode on the upper menu.

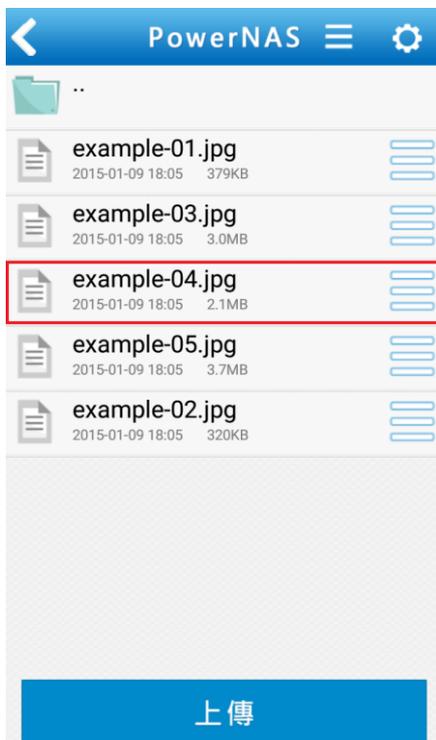

By clicking on the menu to the right of each file, you can download it.

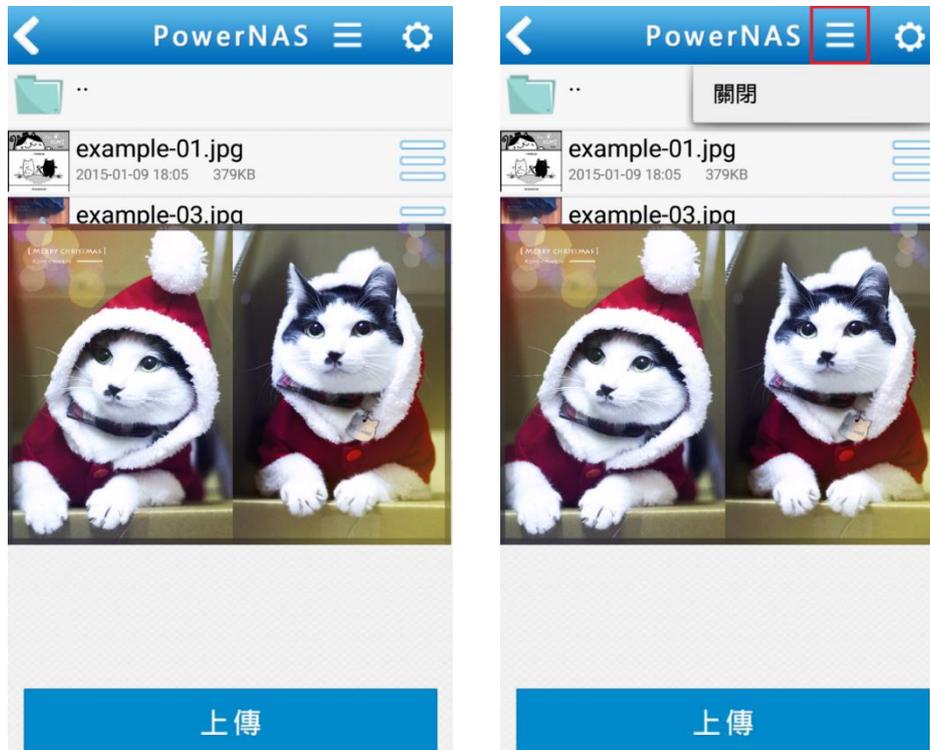

After downloading, select the open method in the notice frame.

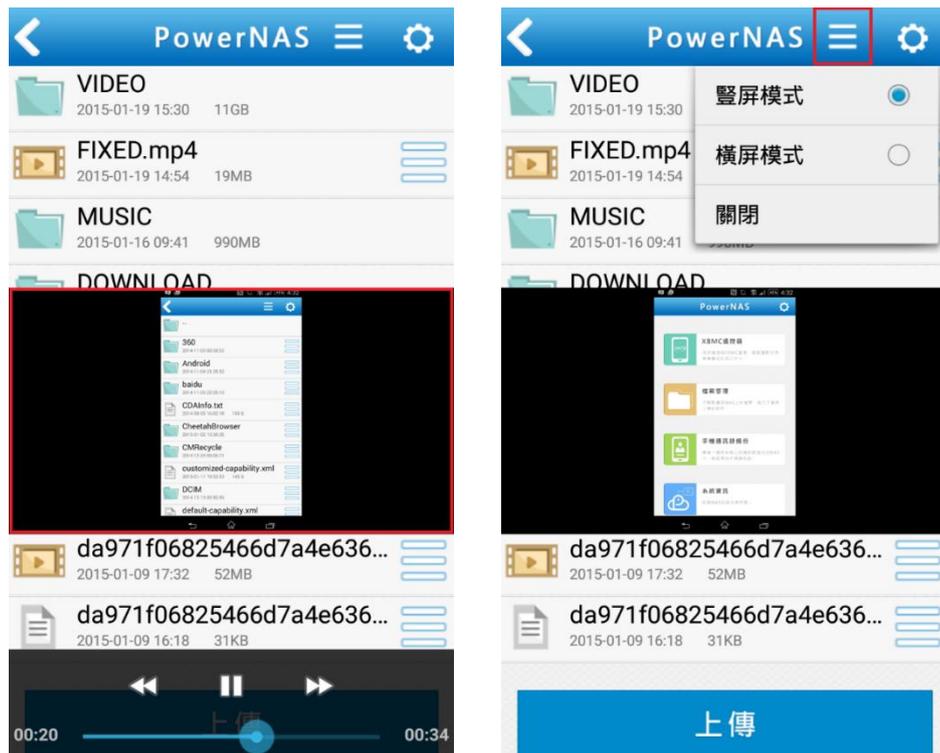

Click the image file item to preview it. If you cannot open the file, please download it.

In the image preview status, you can zoom-in or zoom-out by using two fingers. The upper menu can close this preview function.

Click the **VIDEO** file items to preview. If you cannot open it, please download the file.

In the video preview status, you can use the upper menu to change the screen direction and close the preview mode.

Upload the files or photos in your smartphone to the current browsing path.

## II. Photo Uploading

After the smartphone photos are displayed on the screen, click the top right frame and tap **File Confirm**. Then the photos can be uploaded.

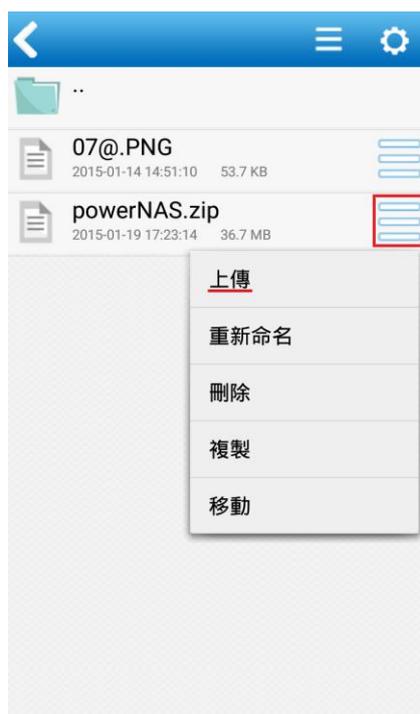

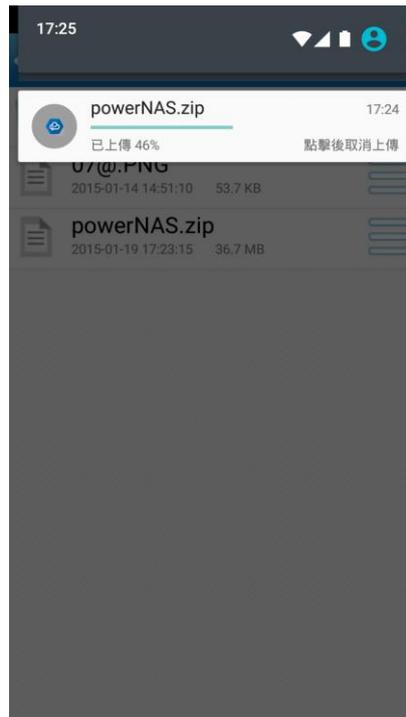

With **Camera Shooting**, you can use the smartphone camera to shoot photos. After confirming your file, start uploading.

### III. File Uploading

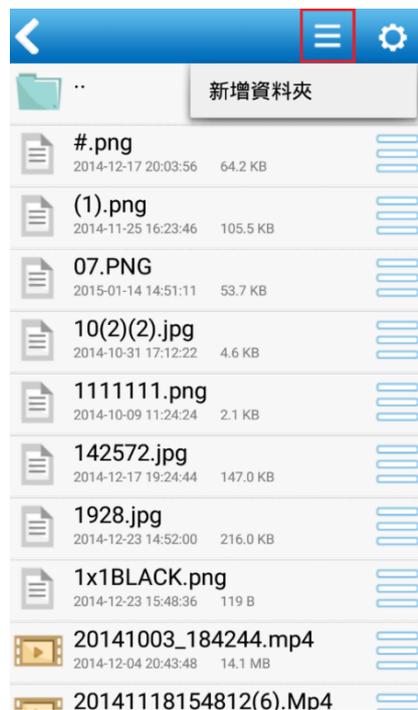

After entering into the smartphone storage space, find the file placement pathway. Then click the menu to the right of each file. Select **Upload** and start uploading at once.

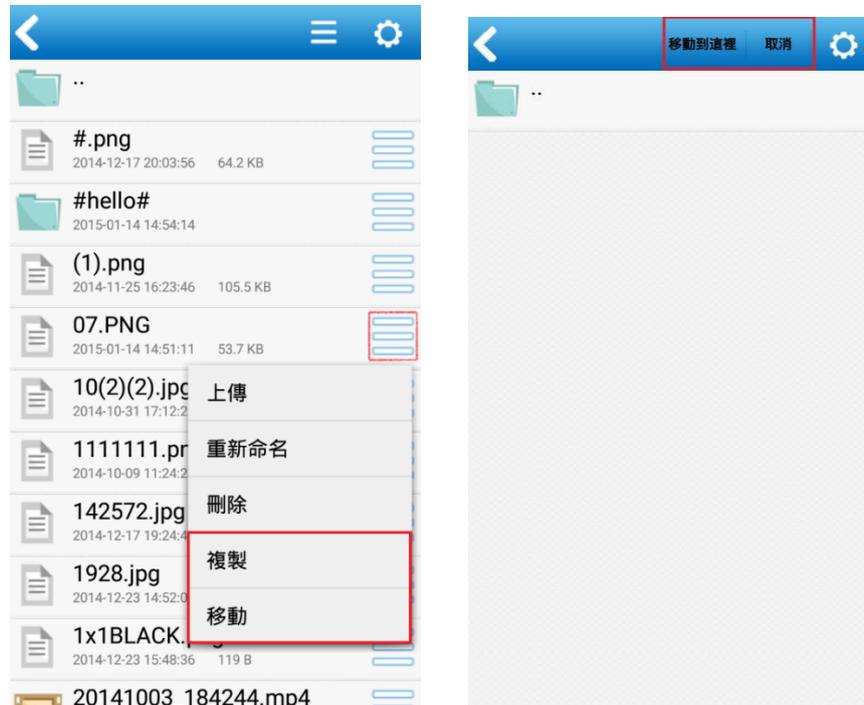

#### IV. Smartphone Storage Space

On the upper menu, you can add a folder under the existing browsing path.

By clicking the menu to the right of each file, you can copy or move that file to another path.

By clicking the menu to the right of each file, you can rename that file.

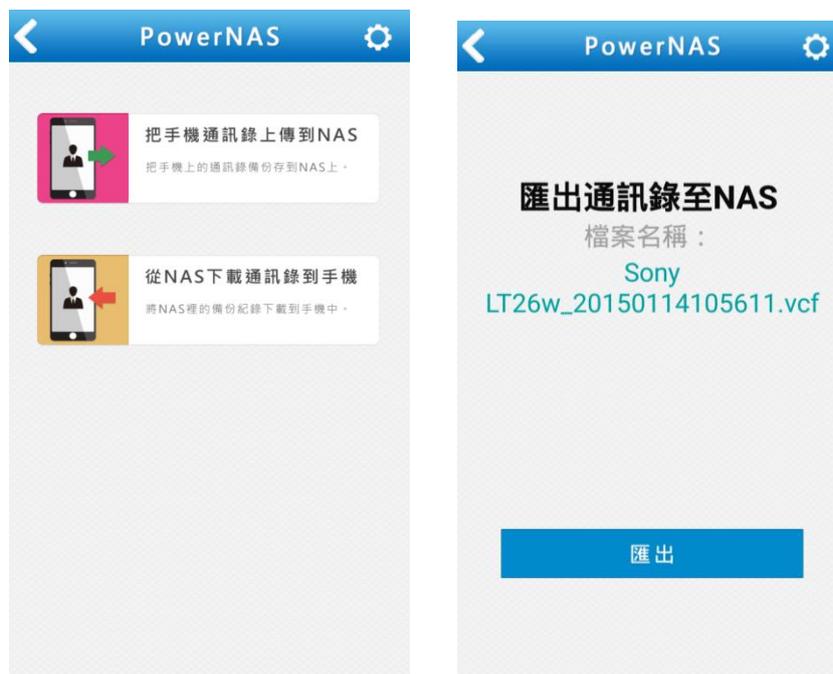

By clicking the menu to the right of each file, you can delete that file permanently.

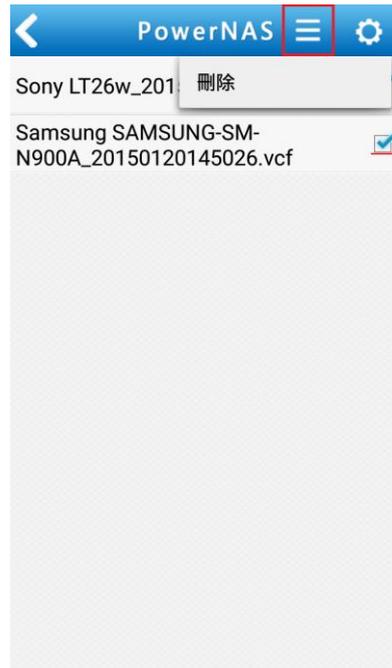

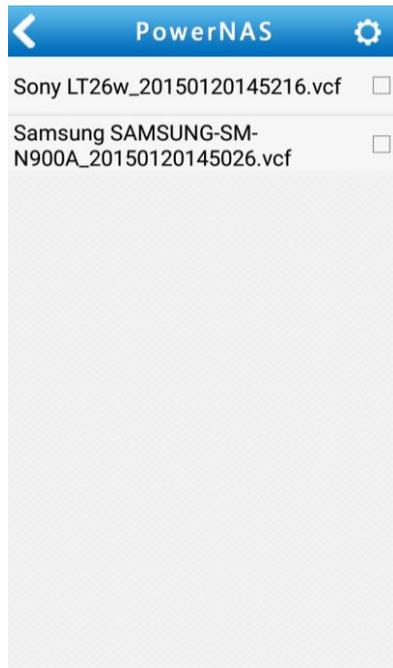

## (5) Smartphone Directory Backup

On the main page of **Smartphone Directory Backup**, you can select **Export**(upload) or **Import**(download).

After selecting **Import**, click the backup directory items. Confirm and then import. You also can check the Confirm frame to the right of the file items. Then delete the backup directory via the upper menu.

## (6) System Info

See the hardware status of PowerNAS.
